KICKR DESIGN®

What capabilities do you actually need?

Before hiring anyone, use this chart to make a simple capability map. Then, make a decision based on the gaps. You may discover that what looked like a mechanical-design project actually requires 5 different disciplines.

Capability	Do we have it internally?	Do we need outside support?
Product Strategy		
Industrial Design		
Mechanical Engineering		
Electrical Engineering		
Firmware/Software		
Prototyping		
Testing		
DFM		
Manufacturing		
Quality/Regulatory		

If you are exploring a new product, facing bandwidth constraints, or navigating a complex development cycle, we would be happy to compare notes.

Have a conversation with our team. No pitch. No pressure. Just a working session to understand your project and see if support would be useful.
